Homeland Security: Protecting the Nation's Communications Network Against Attack Tops Agenda for Upcoming National Reliability and Interoperability Council Meeting December 6, 2002

Washington, DC. – Senior representatives from the telecommunications, cable, Internet and satellite industries will consider next week a series of comprehensive recommendations to protect the nation's communications infrastructure – both physical and cyber – against attack. The proposals will be presented at the Network Reliability and Interoperability Council (NRIC) VI quarterly meeting Friday, December 6, 2002.

FCC Chairman Michael K. Powell and Richard C. Notebaert, NRIC Chairman and Chairman and CEO of Qwest Communications will chair the meeting which will run from 10:00 a.m. – 1:00 p.m. at the Federal Communications Commission, in the Commission Meeting Room at 445 12th Street, S.W., Washington, D.C.

Chairman Powell chartered NRIC VI January 7, 2002 to focus on homeland security by ensuring the security and sustainability of public telecommunications networks in the event of a terrorist attack or national disaster. Membership in NRIC was significantly expanded through NRIC VI to include corporate representatives from the cable, wireless, satellite and ISP industries. It also established four new working groups to address homeland security: Physical Security, Cyber Security, Disaster Recovery and Public Safety.

Members of the general public may attend the meeting. Real audio and streaming video access to the meeting will be available at <http://www.fcc.gov>. The public may submit written comments before the meeting to Jeffery Goldthorp, the Commission's Designated Federal Officer for the Network Reliability and Interoperability Council (jgoldtho@fcc.gov).
